---

**Dear Secretary Sebilius**

**We are writing to register our strong objection to the Department of Health and Human Services latest mandate regarding Contraception & Sterilization as preventative Services for Women.**

**Together with our strong moral objection, which our Government seemingly delights in denigrating, we are also writing to register our objection to Government attempting to impose itself in our daily lives. There is a long list of other failed programs which have been imposed on the Public but this one will suffice for now.**

**Government programs, such as these, which are imagined, calculated and imposed, have, time and again, been proven not to succeed, but to fail. The Government's program, which pays young women to become pregnant, is 180 degrees opposed to your new mandate.**

**The Government does not do this you say? Of course it does when it rewards pregnancy with Public funds to support the mother and child and continues to do so, with each new child, with each new father. You tell them to stop but you pay them to go.**

**All your new program will do is foster immoral sexual unions and result in more abortions. If you are proud that we have had over 55 million abortions in this country, not counting those cause by "morning after pills", shame on you.**

**But don't ask us to pay for your new program which the Insurers will necessarily raise our premiums to pay for, but because, as Christians, we find it totally repulsive.**

**Leonard J. and Yolanda T. Bibbo
